

Acadiana GOHSEP Region 4 HF Linkup Frequencies

The Linkup frequencies listed below are to be used by GOHSEP Region 4 hams for region wide communications and for hams that have evacuated but want to stay in radio contact with other hams from Region 4 to share news and information. Lafayette Parish OHSEP will also use these frequencies to pass information from the affected areas in Region 4 to hams that have evacuated. In addition, these Linkup frequencies can be used by GOHSEP and/or Lafayette OHSEP to request hams return to Region 4 to assist in Emergency Communications. For events not requiring evacuation the Linkup frequencies should also be used as Region 4 HF Guard frequencies. All frequencies are (+/-) except 3.803 MHz which is (+) only.

BAND	VOICE	DIGITAL *	NOTE
80 Meter	3.803 MHz	3.528 MHz	Primary Night
