

# ACADIANA SKYWARN AND EMCOMM VHF/UHF FREQUENCIES

For Skywarn or EmComm activation, Acadiana area hams are to use the repeaters listed below. Start with the Skywarn Primary repeater (Echolink node: 877350). If the Skywarn Primary repeater fails, switch to the Backup #1 repeater (Echolink node: 370324). If the Backup #1 repeater fails, switch to the Backup #2 repeater. If Backup #2 repeater fails, switch to the simplex frequency for the quadrant you are in.

**NOTICE:** When using repeaters, key up then wait 1-2 seconds before speaking to allow repeater to switch from receive to transmit.

REPEATER NAME	CHANNEL*	FREQUENCY	OFFSET	PL TONE
SKYWARN PRIMARY	01	145.370	(-)	See map
BACKUP #1	02	146.820	(-)	103.5
BACKUP #2	03	443.000	(+)	103.5
ACADIANA SIMPLEX	04	147.420		
ACADIANA DIGITAL	14	147.520	+1500 on waterfall	Mode: MT63-1KL

\* From Region 4 EMCOMM Channel List

Please note that ONLY the SKYWARN PRIMARY repeater has different PL Tones for each quadrant.
